

Hit snooze this summer

Installing automatic cluster removers, allows you to free up staff during milking times giving everyone an opportunity to hit the snooze button this summer.

Here are some key benefits:

- Reallocate labour to other on farm/management tasks
- Standardises the milking routine when coupled with auto teat sprayers
- Improve udder health with reduced over milking

Start your automation future with GEA, contact your local GEA Sales Manager on 027 588 5961 or Nind Dairy Services.

GEA iCR Cluster Remover

- Easy upgrade options - bail restraints & teat spraying
- Hand held remote for easy programming
- Highly visible mode indicators on the ram
- Easy kick off identification in a herringbone - cluster lowers into the pit
- Very low maintenance & easily accessible rams
